# CRIMINOLOGICAL RESEARCH BULLETIN

Marvin Bressler

Dr. Marvin Bressler is a member of the Department of Sociology of the University of Pennsylvania. His major research activities have been concentrated in the areas of Social Disorganization and Social Attitudes. He has contributed to the compilation of several other bibliographical surveys in the field of criminology—EDITOR.

The current "Criminological Research Bulletin" is the second edition of the New Series, the first number of which was edited by Professor Otto Pollak and published in the *Journal of Criminal Law and Criminology* in March-April 1950.<sup>1</sup> The Bulletin, primarily a survey of studies in criminology which are in progress, recently completed, and/or in the process of publication, was undertaken because the increasing number of research projects which have been performed in criminology in recent years necessitates the existence of some accessible centralized research census. The present edition will include those studies which were initiated between October 1949 and October 1952.

The Bulletin was compiled largely on the basis of returns to thirteen hundred questionnaires sent to persons who by their organizational or administrative affiliations or by virtue of their scholarly contributions to the field of criminology might be presumed to have undertaken criminological research since October 1949. Each respondent was asked to give his name, address or institutional affiliation, title of the project, its status with respect to its completion, a short description of his project, and its classification according to a classification scheme which is nearly identical to the one devised by Pollak: I. Criminal Statistics; II. Causation; III. Police Organization and Administration; IV. Science of Detection; V. Law, Procedure and the Administration of Justice; VI. Treatment (A) Institutional, (B) Probation and Parole, (C) Other, (D) Effectiveness of Treatment; and VII. Miscellaneous.

The response to the questionnaires which revealed the existence of a gratifyingly large number of research projects compelled some modification of the projected scope of the Bulletin. Considerations of space dictated the elimination of a section which would have indicated the status of projects described in the preceding Bulletin together with full citations of those works which have been published in the intervening years. For current projects it was necessary to dispense with the brief summary of the project. It is hoped that the title of the research will be sufficiently descriptive to reveal the nature and the scope

of the study. No recently completed project which is available in book form or in the readily accessible periodical literature is listed in this Bulletin. However, a limited number of studies which have been published by administrative agencies, independent commissions, etc., or appear in relatively obscure sources are included. These are listed as "Completed and published." Those who wish information concerning the availability of these and the other studies listed in the Bulletin will be obliged to correspond with the individual investigator.

There is little doubt that some eligible persons have not been circularized although every effort has been made to compile a complete record of current research activities. The editor wishes to express his thanks to all those persons who replied to the questionnaire and his sincere regrets to those whose reports of research for one reason or another could not be included in this edition of the Bulletin.
