warming stories of seven innocent men who had been wrongfully imprisoned and the means by which they were released. The book sounds a ringing plea for more constructive thought on penal conditions, more scientific means of crime detection, more impartial criminal justice, more accent on rehabilitation of the man in prison, and more skilled trial methods. What we really need, says Gardner, is "better justice; more competent, better paid police officers; better investigative work; better proof for juries so that guesswork isn't called for when there should be evidence." Then and only then, maintains the author, can the American legal system honestly apply the fundamental judicial principle that a man is innocent until *proved* guilty.
