Part of the Criminal Law Commons, Criminology Commons, and the Criminology and Criminal Justice Commons

Recommended Citation

This Criminology is brought to you for free and open access by Northwestern University School of Law Scholarly Commons. It has been accepted for inclusion in Journal of Criminal Law and Criminology by an authorized editor of Northwestern University School of Law Scholarly Commons.
Since the incorporation, in 1932, of the American Journal of Police Science into the Journal of Criminal Law and Criminology there has arisen a growing need for a comprehensive index of the police science material which has accumulated in both of these publications. With a view of accommodating police science readers in this particular the following index, or perhaps more properly designated guide, has been prepared and published.

The various police science contributions which have appeared in the three volumes of the American Journal of Police Science and in the five volumes of the Journal of Criminal Law and Criminology since the combination of these two journals, have been grouped under the following titles, and in the order named: (1) Personal Identification; (2) Document Examination; (3) Firearms and Firearms Identification; (4) Microanalysis; (5) Comparative Micrography; (6) Detection of Deception; (7) Chemistry and Toxicology; (8) Legal Medicine and Medical Jurisprudence; (9) Blood Tests; (10) Tracks, Impressions, and Their Preservation; (11) Photography, Plans and Sketches; (12) Light and Radiation; (13) Expert Witness; (14) Laboratories and Institutes; (15) Instruction and Training for Criminal Investigators and Police Officers; (16) Police; (17) Miscellaneous; (18) Book Reviews. This arrangement was thought to be of greater value to police science readers than the conventional type of index. Subclassifications have been omitted, except in two instances. The relatively few contributions appearing under each of so large a number of possible subtopics did not seem to justify a further classification.

The citations should be interpreted as follows: the first number represents the volume (1, 2, and 3 of the American Journal of Police Science at the time of its individual identity as such; 23, 24, 25, 26, and 27 of the Journal of Criminal Law and Criminology, containing the American Journal of Police Science since the combination of both publications), the second number the particular issue of either journal, and the third number or numbers the page reference. The asterisk (*) signifies that the article is illustrated.

*Prepared by Fred E. Inbau, Editor.

PERSONAL IDENTIFICATION

Fingerprints

*Attempts to Alter and Obliterate Finger-Prints, by Harold Cummins. 25:6: 982-992
*Counterfeit Finger-Prints, by Harold Cummins. 25:4: 666-671
Fingerprints Can Be Forged, by C. D. Lee. 25:4: 671-674
Racial Differences in Finger-Prints, by Harold Cummins. 25:5: 829-835
Friction Ridge Patterns Altered by Leprosy (note). 26:2: 274-275
Finger Patterns, by Louis Herrman. 25:1: 171-172
Finger-Print Powders (note). 25:1: 555-575

New Method for Transferring Finger-Print Traces, by D. Leung. 2:2: 183

*Tracing Paternity by Finger Prints, by A. Lauer and H. Poll. 1:1: 92-100
*Proof of Finger-Prints, by Albert S. Osborn. 26:4: 587-594

Scientific Evidence in Criminal Cases: III. Finger-Prints and Palm-Prints, by Fred E. Inbau. 25:3: 500-517
Fingerprint Testimony, by John H. Wigmore. 2:3: 272
Finger-Print Testimony (note). 25:6:1005

Criminal Identification, by J. Edgar Hoover. 2:1: 8-20
International Exchange of Fingerprints, by John Edgar Hoover. 24:3: 664-668
The National Division of Identification and Information, by J. Edgar Hoover. 2:3: 241-252

Other Methods

Personal Identification by Electrocardiography, by Israel Castellanos. 23:2: 356-361
A "New" Method of Identification (note). 26:4: 609-610
Identification by Means of Blood Vessel Pattern of the Eye (note). 26:5: 752-754
Forensic Value of Teeth in Identification of Five Victims, by Alexander Klein. 1:3: 325
The Identification of an Amnesia Victim by the Use of Scopolamine —An Experiment, by Merle M. Mosier and Everett R. Hames. 26:3: 431-438
Laundry Marks (note). 26:1: 118
The Fallibility of Eyewitness Testimony, by Emory Smith. 1:5: 497-496
Showing Prisoners to Witnesses for Identification, by F. Gorp. 1:1: 79-89

(2)

DOCUMENT EXAMINATION

*Scientific Documentary Evidence in Criminal Trials, by C. Ainsworth Mitchell. 23:2: 336-351
*Science and Advancements in the Examination of Questioned Documents, by James Clark Sellers. 3:2: 110-124
